PWX	Annually	0.1659	12/22/2023

### Why Invest in this fund?

- Strictly adheres to a value investment style: buying undervalued, out-of-favour or misunderstood situations, which can generate competitive long-term returns as these situations re-price in the market.
- Invests globally in a free-to-roam mandate that is concentrated in the portfolio manager's highest conviction ideas.
- Fund uses a pure bottom-up stock selection process, thus avoiding the need to time the markets.

### Risk Tolerance

-----	---------------	------

<sup>†</sup> The MSCI World Index is a free float adjusted, market capitalization weighted index that is designed to measure the equity market performance of developed markets. It consists of 24 developed market country indices.

\*\* The major holdings of the Fund may, but do not necessarily, represent the largest holdings of the Fund. Rather, the major holdings are selected for their overall significance in evaluating the investment portfolio.

<sup>‡</sup> Commissions, trailing commissions, management fees, and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. The indicated rates of return are the historical annual compounded total returns as of August 30, 2024 including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution, or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated. Standard deviation provides a measure of the variability of returns that have occurred relative to the average return. The higher the standard deviation, the greater is the range of returns that has been experienced. Standard deviation is commonly used as a measure of risk.
